

Efficient filter

MJS-501 has a very efficient filter that removes chalk and bacteria from the water. No more cleaning off white dust from interiors!

Bedroom approved

MJS-501 has very quiet operations. It won't disturb your sleep and you can throughout the night!

Multi function

MJS-501 lets you choose between warm and cold mist. During the winter the steam will warm you and is better absorbed by the air.

Money saving!

This very energy efficient humidifier will not affect your electrical bill. The MJS-501 only consumes 30W when running on normal mode.

Fresher air!

Activate the ozone function and you'll get a combined humidifier and air freshener. This way you'll get the healthiest indoor air!

MJS-501 has a convenient remote control that makes it even easier to always reach the perfect humidity in your home!

MJS-501 is a very efficient humidifier that can provide both cold mist and hot steam. This clever humidifier will refresh the air with ionization at the same time as it humidifies. The generous water tank is easy to refill and to clean and lets you see the current water level.

The HACE MJS-501 is very quiet. So quiet, in fact, that you can run it throughout the night with disturbing your sleep.

The MJS-501 has a clear display and touch buttons that make it very easy to use. Thanks to the adjustable nozzle you are able to direct the mist exhausted from the humidifier.

- Timer
- Remote control
- Air freshener
